LinkedIn Id: www.linkedin.com/in/saravanan-g-0aa599a3

OBJECTIVE:

To work in an innovative and challenging environment that can explore my skills and challenge my potentials, thereby I can utilize my skills efficiently for organizational growth.

PROFESSIONAL SUMMARY:

- ▣ Around 3 years of experience in Salesforce CRM and Platform.
- ▣ Flexible to adapt to any new environment and work on any project.
- ▣ Good interpersonal skills, committed, result oriented, hard working with a quest and zeal to learn new technologies.
- ▣ A skilled problem-solver, Quick learner and an efficient team player.

SALESFORCE SKILL SET:

- ▣ Salesforce Out of Box features.
- ▣ Configurations - Workflows, process Builder, Flows Approval process, Record types, Security Model, Validations, Reports and Dashboards, Creating Profiles, Roles, Users, Page Layouts, Email templates, Reports, Dashboards, Tasks and Actions, custom settings.
- ▣ Customization - Apex triggers/classes/Batches, Test class.
- ▣ Lightning components development (LWC).
- ▣ Deployment process through Change sets/Package.
- ▣ Einstein Analytics, Datasets, Dataflows, Recipes, Dashboards and lenses.

CERTIFICATION:

- ▣ **Certified Developer: Salesforce Certified Platform Developer I. Certified**
- ▣ **Admin: Salesforce Certified Administrator.**

SMART Logistics:

- o It is an IOT tags-based company. They will provide the tags to their customer. Tags will send the information to the cloud and then it will be pushed to salesforce. In Salesforce we maintained several functionalities based on the input data.

Role : Developer
Environment : Salesforce.com

Responsibilities:

- o My role is to develop, support, maintain the salesforce application and make enhancement based on the business requirement.
- o Worked on Access Control & Configured Of org wide defaults, Sharing rule, Permission sets in the existing system.
- o Worked on Apex Classes, Triggers, Data loader, Workbench, Batch, Test class coverage.
- o Created Reports & Dashboard.
- o Worked on Batch apex, Lightning Web component.
- o Handled Custom profile, Public Group and Roles to distribute user rights and functionality.
- o Develop & Maintain validation rules, Process Builder, Flows & Workflows.
- o Customize existing page layouts for individual business units within the organization.
- o Create and manage custom object, fields & formulas.

Integrations:

- o NimbeLink Integration- Receive device data from IOT devices
- o NimbeLink Activation/Deactivation API – Activate or deactivate the IOT devices from salesforce.

Lead Management Discovery:

- o lead management is an integral part of the CRM platform, offering powerful tools to capture, nurture, and convert leads into customers.
- o Through lead capture features, leads information stored in the “Leads” object, while lead qualification & scoring rules help prioritize prospects.
- o Robust tracking and analytics allow for data-driven decisions, while seamless lead conversion simplifies the process of turning leads into accounts, contacts, and opportunities.
- o In addition to traditional lead management practices, Salesforce also enables businesses to leverage artificial intelligence and machine learning through its Einstein AI capabilities. Einstein Lead Scoring, for instance, automates lead qualification by predicting which leads are most likely to convert, further streamlining the sales process and enhancing efficiency.

Role : Developer
Environment : Salesforce.com

Responsibilities:

- Done a POC to integrate Salesforce with Acquia.
- Create and manage custom object, fields.
- Created web-to-lead form.
- Develop & Maintain validation rules, Process Builder, Flows & Workflows.
- Done a POC to integrate Salesforce with Talend.
- Done a POC to integrate Salesforce with Informatica.
- Worked on Tradition Lead scoring & Einstein Lead Scoring.

Panoramic Health Care:

- It is a supporting system which works in Salesforce Health Cloud Service.

Role : Developer

Environment : Salesforce.com

Responsibilities:

- Worked with Health Cloud and Sales Cloud, enhancing the ability to manage and support healthcare and sales processes effectively
- Developed Apex (Classes and triggers), Lightning Web Components to extend Salesforce inorder to support business requirements.
- Developed both Screen Flows and Record Trigger Flows. Successfully optimized business processes, reduce the code function and go with Standard function
- Deployed changes through Change Sets, reducing deployment errors and ensuring smooth transitions between environments.
- Designed and implemented user roles, profiles, page layouts, and record types, streamlining workflows and ensuring compliance with industry standards and enhancing data security.
